# INSTALLATION INSTRUCTIONS
# CERAMIC VANITY TOP

INTEGRAL MODELS

***ALL SIZES***

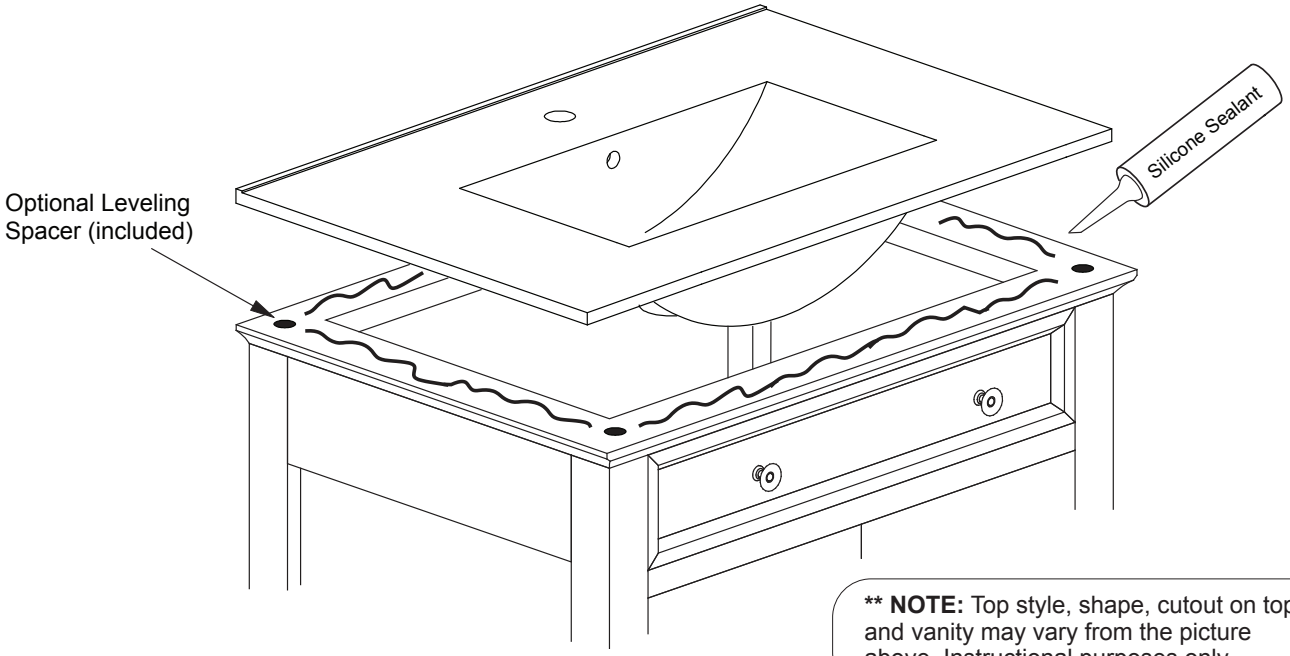
## SUGGESTED TOOLS AND MATERIALS

Silicone Sealant

Level

Tape Measure

Safety Glasses



**** NOTE:** Top style, shape, cutout on top, and vanity may vary from the picture above. Instructional purposes only.

## VANITY TOP INSTALLATIONS

1. Install the cabinet / vanity according to the cabinet / vanity manufacturer
2. Check to make sure the vanity top sits level on top of the vanity
3. If all four corners of the vanity top do not sift flush on the vanity, use the optional leveling spacers (included) to help level the vanity top
4. Apply silicone sealant to the top of cabinet / vanity as shown above
5. Install faucet and drain assembly per the manufacturers' instructions

## CARE AND CLEANING

For best results in caring for your ceramic vanity top, we suggest:

- Always wipe off spills immediately
- Never use a strong / abrasive cleaner. Always test your cleaning solution on an unnoticeable area before applying it to the entire surface.
- Wipe surfaces clean, immediately after applying cleaner.
- Do not allow the cleaner to sit or soak. Never let cleaners sit on the surface of the lavatory.
- Use a soft, dampened sponge or cloth. Never use an abrasive material such as a brush or scouring pad to clean surfaces, they will scratch the lavatory surface.
- Always rinse and wipe clean the fixtures to prevent soap buildup.
